

Greenstar 8000 F flue kits

The Greenstar 8000 F is a floor-standing boiler that comes with specially designed flues, making it suitable for installations in places like under a kitchen countertop. It can be used with horizontal, high-level horizontal or vertical flues, depending on the setup. The components included in the kit will vary based on which flue option you choose. Here's a breakdown of what's included in each flue kit.

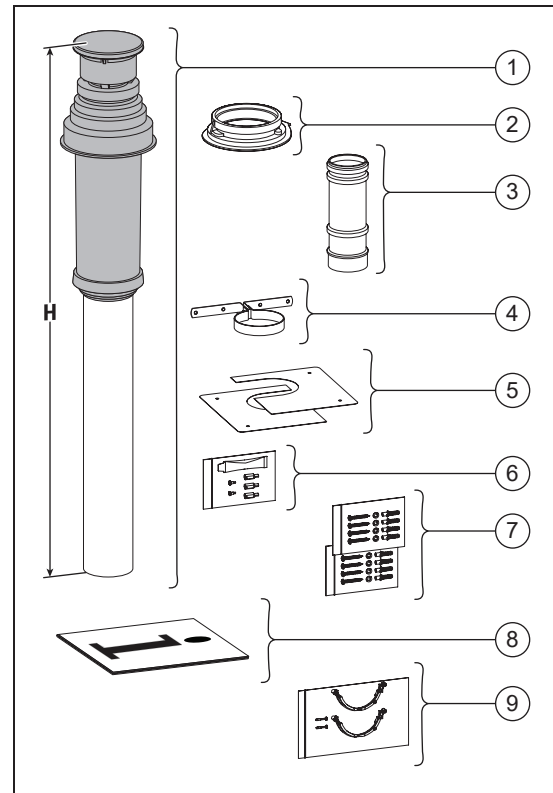

What's in the box?

High-level horizontal flue kit

- | | |
|---------------------------------|------------------------|
| [1] Flue connector | [7] Inner seal (white) |
| [2] Telescopic flue | [8] Outer seal (black) |

| [4] Support bracket | |
| [5] Fire stop plates | |
| [6] Flue connector mounting accessories | |

*Flue adaptor size/shape varies depending on flue diameter (60/100 or 80/125)

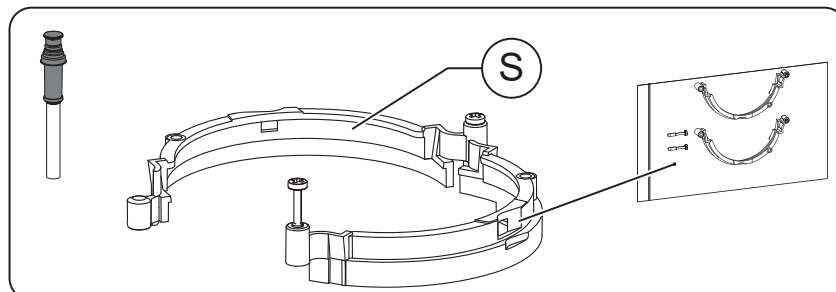

Flue adaptor clamps

The clamp for the horizontal flue comes pre-fitted to the boiler. The clamp for the vertical & high-level horizontal flue comes with the vertical flue or high-level horizontal connector kits.

Horizontal flue assembly

Vertical and high-level horizontal flue assembly

M: Metal clamp (used to connect the adaptor elbow to the appliance exhaust outlet).

S: Small clamp (used to connect the flue adaptor to the appliance exhaust outlet).
