

Greenstar 8000 F flue installation examples

Below are some common examples of flue positioning and the part numbers required for such an installation. Other distances, bends and lengths are feasible. Refer to the appliance manual for more detail on flue lengths (L) and flue terminal positioning.

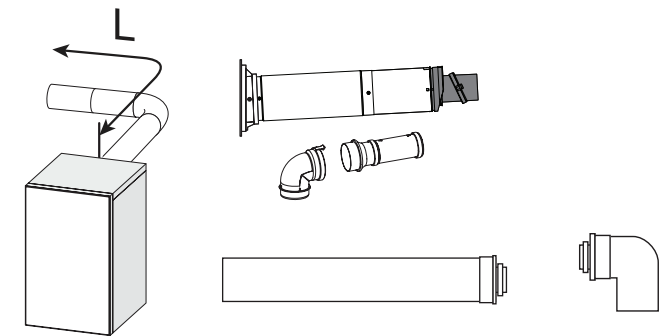

Horizontal flue assembly

Extended horizontal flue

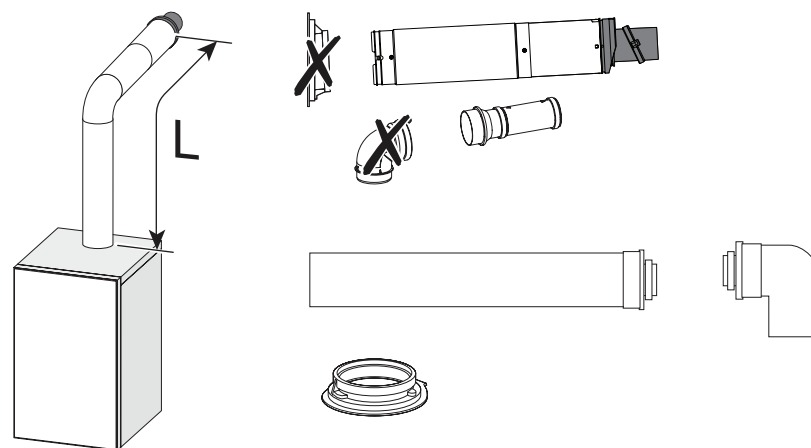

Horizontal flue with 90° elbow(s)

60/100	8000 F Flue Kit 60/100 Horizontal	7 724 001 996	8000 F Flue Kit 60/100 Horizontal		7 724 001 996	8000 F Flue Kit 60/100 Horizontal		7 724 001 996
			Flue Extension	220mm	7 716 191 133	Flue Extension	220mm	7 716 191 133
				960mm	7 716 191 083		960mm	7 716 191 083
				2m	7 716 191 172		2m	7 716 191 172
					90° Flue Bend		7 716 191 084	
80/125	8000 F Flue Kit 80/125 Horizontal	7 724 001 998	8000 F Flue Kit 80/125 Horizontal		7 724 001 998	8000 F Flue Kit 80/125 Horizontal		7 724 001 998
			Flue Extension	960mm	7 719 003 666	Flue Extension	960mm	7 719 003 666
						90° Flue Bend		7 719 003 664

High-level horizontal flue assembly

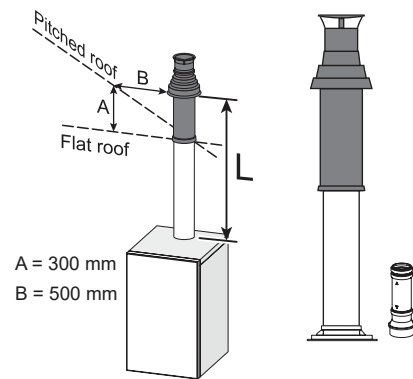

60/100	8000 F Flue Kit 60/100 Horizontal		7 724 001 996
	Flue Extension	220mm	7 716 191 133
		960mm	7 716 191 083
		2m	7 716 191 172
	90° Flue Bend		7 716 191 084
80/125	8000 F Flue Connector 60/100 Vertical		7 733 601 590
	8000 F Flue Kit 80/125 Horizontal		7 724 001 998
	Flue Extension	960mm	7 719 003 666
	90° Flue Bend		7 719 003 664
	8000 F Flue Connector 80/125 Vertical		7 733 601 598

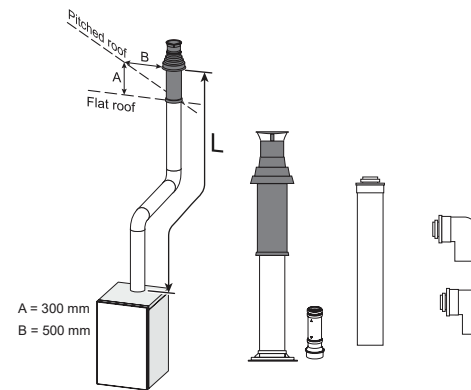

Not required:

For a high-level horizontal flue kit, the 90° elbow and the angled terminal cap (7 724 001 996 or 7 724 001 998) are not required. These are indicated with crosses in the diagram. The '8000 F Flue Connector' is a non-angled connector, to allow the flue to go vertically from the boiler.

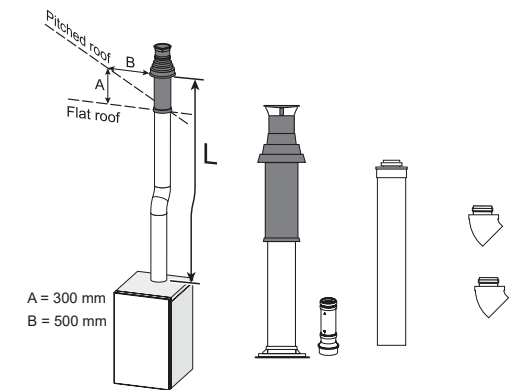

Vertical balanced flue assembly

Vertical balanced flue with 90° elbow offset

Vertical balanced flue with 45° elbow offset
