Greenstore hot water storage 36-37
The importance of system filtration 38-39
Preventing frozen condensate pipework 40-41
How to get a Worcester Bosch boiler installed in your home 42-47
Worcester Bosch – supporting you from the start 48-49
Other products from Bosch for your home and garden 50-51
Comparison tables and technical information 52-54
Why should Worcester Bosch be your next boiler choice?

Worcester Bosch is the choice for millions of quality and value focused homeowners. In a recent customer satisfaction survey it has been revealed that we are also the choice of professional tradesmen too, with 9 out of 10 heating engineers choosing Worcester Bosch to provide warmth and hot water for their homes and families.

WHICH? Best Buy
Our Greenstar range of gas boilers have been recommended by Which? for 10 years.

Rated Excellent
Our customers rate us excellent on Trustpilot.co.uk

Peace of mind guaranteed
Our Greenstar boilers are now guaranteed for up to 12 years*.

UK based and proud
Dedicated manufacturing plants in Worcester and Clay Cross, Derbyshire.

Part of the Bosch Group
All Worcester products are manufactured with Bosch levels of quality and reliability as standard.

Royal Warrant
We are honoured to have received a Royal Warrant in recognition of supplying goods to Her Majesty The Queen.

A percentage of the profits made by Worcester Bosch is donated to charities and good causes by the Robert Bosch Foundation, a non-profit charitable trust which owns 92% of the Bosch Group.

* Terms and conditions apply
In the 2019 Boiler Brands report carried out by Which? our boilers scored brilliantly once again, being awarded Best Buys across the entire Greenstar Gas boiler range for the 10th year.

Our Greenstar Gas range performed exceptionally where it matters most, notably for reliability, build quality, customer score and recommendation.

Which? Commented:

“Reliability is the single most important consideration when buying a new boiler and Worcester Bosch has it in spades.”

Online reviews

Further endorsements of our boilers can be found on a variety of online review sites including Trustpilot where we are consistently rated excellent from over 14,859 independent customers.

**As of 13th January 2020.**
“We’ve been running boiler reliability surveys for 10 years now, and Worcester Bosch has impressed us every year.”

Which?

Gas Boilers September 2019
The key facts about heating and hot water

There’s a huge range of boilers on the market, so finding one that perfectly suits your home and lifestyle can be tricky. Another consideration is how you use your heating and hot water and if it might change, such as if your family is growing. In every case, we recommend talking to an expert installer.

A leap in efficiency

- Boilers account for about 60%* of a household’s annual energy costs, so have a big effect on fuel bills.
- With older gas boilers, a considerable amount of heat that could be used to generate heating and hot water is wasted, making them increasingly expensive to run.
- Worcester Bosch boilers are all more than 90% efficient, so over 90p of every £1 you spend on fuel for your boiler is used for your heating and hot water.
- Adding a Bosch EasyControl internet-connected Smart controller can boost your heating system efficiency to an impressive 98% (also known as A+).

For every...

£1

OLD

1992 Worcester 240

You typically receive
65p worth of heat

NEW

2020 Greenstar 30Si Compact with Bosch EasyControl

You typically receive
98p worth of heat

Upgrade your heating system and save up to £315 for a year†.

Wise choices

A new boiler can be a sizeable investment, so it’s important to choose wisely. It makes sense to consider the durability of parts and maintenance costs. By discussing everything with experts like your Worcester Bosch installer, you’ll make certain of the best long-term value for money, giving you financial peace of mind as well as comfort and warmth.

Smaller carbon footprint

Domestic boilers currently account for 21%* of the UK’s total CO₂ emissions so the greater their efficiency, the more kind they are to the environment.

* Source: Energy Saving Trust. †Source: Energy Saving Trust. Figure based on installing a new A-rated condensing boiler with a programmer, room thermostat and thermostatic radiator controls (TRVs) in a gas-heated home from an older boiler with a programmer and room thermostat. Savings of up to £315 but can vary depending on the size and thermal performance of your home. Figures are based on fuel prices as of March 2019.
Which heating and hot water system is best for me and my lifestyle?
Typical combination boiler heating system

A combination or ‘combi’ boiler is both a high efficiency water heater and a central heating boiler in a single compact unit. Combi boilers heat water directly from the mains when you turn on a tap, so you won’t need a hot water storage cylinder or a cold water storage tank in the roof space. They are also very cost-effective and energy-efficient as water is heated instantly rather than being heated and then stored in a cylinder.

An added benefit is that hot water is delivered at mains pressure, which means that you could get a powerful shower without the need for a separate pump.

Advantages

- Compact sizes make combi boilers perfect for smaller properties
- Perfect where there is little or no loft space
- No need for a hot water cylinder which allows increased living space
- No cold water storage tank frees up loft space for conversion
- No risk of loft pipework freezing
- Less pipework in the home makes installation typically cheaper.

For more information visit worcester-bosch.co.uk/BoilersExplained
Typical system boiler heating system

System boilers require a cylinder for storing hot water, however the major heating and hot water system components are built into the boiler itself, making it quicker and easier to install.

In addition, there is no need for a tank in the loft, so it can be an option in a home with little or no loft space or where the space is earmarked for a conversion. These boilers are also compatible with solar water heating systems, which deliver environmental benefits as well as lower energy bills.

Advantages

- Great for homes with more than one bathroom
- Constant supply of hot water to multiple taps at the same time
- No need for a loft tank, freeing up space and eliminating worries about leaks or frost damage
- Economical to run
- Built-in components makes installation quicker and neater.

For more information visit worcester-bosch.co.uk/BoilersExplained
Typical regular boiler heating system

Regular boilers (sometimes known as traditional, conventional or heat only boilers) are ideally suited to homes that already have a traditional heating and hot water system which is linked to a separate hot water cylinder. These boilers also need a cold water storage tank in the loft to feed the hot water cylinder as well as a tank that maintains the water level of the central heating system. A regular boiler may be the best option for replacing an existing boiler if the property has an older radiator system, as it might not be able to cope with the higher water pressure that is delivered by system or combi boilers.

**Advantages**

- Perfect for homes where a lot of hot water is used at the same time
- Great where there are two or more bathrooms
- A good option in areas where water pressure is low
- Compatible with solar water heating systems for a lower carbon footprint and lower energy costs.

For more information visit worcester-bosch.co.uk/BoilersExplained
Typical system or regular boiler heating system with solar thermal hot water.

System and regular boilers are perfect partners for Worcester Bosch Greenskies solar hot water systems (also known as solar thermal). In a solar thermal system, the panels harness heat from the sun, which is used to heat the water stored in a solar compatible hot water cylinder. The boiler is linked to the system and automatically starts up if the water in the cylinder falls below the required temperature, ensuring you have all the hot water you need all year round.

Effective even on cloudy days and during shorter winter daylight hours, a solar thermal system will typically meet around 60% of your home’s hot water needs, which could mean considerable savings on your energy bills as well as dramatically reduced carbon emissions.

**Advantages**
- Typically generates ‘free’ energy for over half of your hot water needs, giving you lower energy bills
- Particularly beneficial for homes with large families or high hot water usage
- Works in direct and indirect sunlight so that you also benefit in the winter months and on cloudy days
- Compatible with all Worcester Bosch regular and system boilers
- Reduces your carbon footprint.

* Source: Energy Saving Trust.
Compact and space saving, combi boilers are very reliable as well as highly energy-efficient making them economical to run.

Greenstar combi boilers

Combi boilers are the most popular heating and hot water solution in the UK, and they are now the preferred choice for most householders and installers. Worcester Bosch was the pioneer of the combi boiler in the UK, with the Greenstar range developed to suit virtually all homes.

Energy saving and convenient
All Worcester Bosch Greenstar combis are designed and manufactured to provide high levels of performance and operating efficiency. This is achieved through features such as the ‘keep hot’ facility which ensures that hot water is almost instantly available whenever it’s required.

The boilers also incorporate a special ‘ECO’ mode button which can be used to over-ride the ‘keep hot’ facility. This has the bonus of using less gas, as energy is only used when hot water is required.
Greenstar 8000 Style series

Our Greenstar 8000 Style is our most powerful and connected range of wall hung combi boilers. Capable of delivering up to 50kW with the highest hot water flow rates of any wall hung combi boiler on the market. The Greenstar 8000 Style range is perfect for homes of any size.

- Our stunning, design-led range of combi boilers available in high gloss black or white, with an easy to use full colour screen
- Part of our most powerful wall hung combi boiler range, effortlessly heating larger homes with multiple bathrooms
- Features wireless connectivity to the Bosch EasyControl
- Increased efficiency thanks to the improved modulation, which helps to reduce your energy usage
- Up to a 12 year guarantee when installed with a Greenstar System Filter*

Greenstar CDi Compact series

The wall-mounted Greenstar CDi Compact series have the smallest dimensions of our combi boilers. They can be installed in a wide range of locations, including inside a standard kitchen cupboard. Despite their small size, high outputs make them suitable for properties with more than one bathroom.

- User-friendly displays make boiler easy to operate
- Can be installed in a kitchen cupboard
- High efficiency, greater reliability and durability is achieved by the CDi Compact’s innovative heat exchanger
- Wide choice of matching controls enables greater comfort and economy
- Frost protection included as standard
- Keyed filling link included as standard to easily top-up the boiler pressure

We always recommend you consult a qualified Gas Safe installer prior to choosing your boiler.

Greenstar i series
The successor to the popular i Junior series which represent 1 in 10 of all boilers installed in the UK. These wall-mounted boilers are ideal for apartments and small to medium-sized properties with one bathroom.

- Hot water can be adjusted to fine tune your comfort
- Wide choice of matching controls
- Frost protection included as standard

Worcester 2000 series
The Worcester 2000 combi boiler is perfect for small to medium sized homes with one bathroom. This boiler is our quietest combi boiler, and has been designed to comfortably fit between standard kitchen cupboards.

- Bosch engineered quality
- The perfect size for fitting between wall mounted kitchen cupboards
- Incredibly quiet when in use
- Suitable for small to medium sized homes with one bathroom
- Water saving function activated with a quick open and close of a hot water tap

Remote heating and hot water control made Easy!

The EasyControl, our smart connected heating and hot water thermostat from Bosch makes everything easy and puts you in complete control.

Achieving the perfect heating environment has never been so easy – you can decide the times, temperatures and which rooms you want to heat, all from your smart device, wherever you are. Or, let the EasyControl take over, sensing your presence and anticipating your routines, saving energy when you’re out and about, whilst ensuring your house is warm when you return.

See page 34 for further information on achieving an A+ rated system with Bosch EasyControl.
System boilers provide plenty of hot water to multiple taps at the same time and do not need any tanks in the loft.

Greenstar system boilers

Greenstar system boilers are known for their high quality and reliability, making them robust enough to stand up to the highest of heating and hot water demands.

Efficient and economical
Ultra efficient and economical to run, Worcester Bosch system boilers incorporate many of the heating and hot water components found in a traditional heating system, making installation less disruptive and neater.

Space saving and attractive
The compact size of Greenstar i System boilers means that they can fit perfectly into many locations, with the 27kW and 30kW models even fitting into a standard kitchen cupboard. With a smart design, they’ll also look great in your home, whether alongside cupboards or placed on their own.

Perfect partners
Worcester Bosch system boilers can be used with a wide choice of optional controls to maximise comfort and energy savings, and are also perfectly matched to our comprehensive range of Greenstore hot water cylinders. Choosing a complete Worcester Bosch system will ensure you will have a highly efficient solution and the opportunity to get a comprehensive guarantee across your entire system*.

System boilers are also compatible with our Greenskies solar water heating systems, which can be installed at the same time as the boiler or easily retrofitted in the future to reduce your energy bills even further.

* Terms and conditions apply.

- Frost protection included as standard.

Remote heating and hot water control made Easy!
The EasyControl, our smart connected heating and hot water thermostat from Bosch makes everything easy and puts you in complete control.

Achieving the perfect heating environment has never been so easy – you can decide the times, temperatures and which rooms you want to heat, all from your smart device, wherever you are. Or, let the EasyControl take over, sensing your presence and anticipating your routines, saving energy when you’re out and about, whilst ensuring your house is warm when you return.

See page 34 for further information on achieving an A+ rated system with Bosch EasyControl.

† All compatible controls must be used with an optional internal diverter valve.
Regular boilers meet all the heating demands of every size of home and are an ideal energy-efficient replacement for an existing boiler.

With quality and reliability at the heart of every Worcester Bosch regular boiler, they are robust enough to deliver efficient heating and hot water year after year.

Modern efficiencies
With over 90% efficiency, Greenstar regular boilers will help reduce your energy bills and your carbon footprint. They can enhance heating and hot water performance in all sizes of homes, including those with two or more bathrooms, and where mains water pressure is low.

Small in stature
The compact size and smart design of Greenstar regular boilers means that they will look great in any home, with several options readily fitting into a standard kitchen cupboard. Replacement installation is often simple and straightforward, which keeps costs down and disruption to a minimum.

Greenstar regular boilers

Worcester Bosch regular boilers also perfectly meet the need for large hot water requirements. For example, two bathrooms can be comfortably used at once with no loss of pressure or temperature. They can also be combined to cater for high water demand in properties with three or more bathrooms. In this scenario, two boilers would work together to ensure a rapid re-supply of hot water despite the large volumes of water involved.

Solar compatible
All of our regular boilers are compatible with our hot water Greenstore cylinders and our Greenskies solar water heating systems which can help to reduce your energy bills whilst also benefitting the environment.
Greenstar 8000 Life Regular series
Our Greenstar 8000 Life regular boilers make looking after the heating and hot water in your home easy. The range features a modern design, easy to use controls and the power to provide heating and hot water for large homes with multiple bathrooms.

- Frost protection and condensate pump reduces frost risk if installed in a garage or cellar.
Worcester Bosch keeps you in control
Controls for a heating and hot water system typically include two main elements: a time clock or programmer and a room thermostat. Here we explain the different types that we offer and what they do. We also highlight what load and weather compensation mean – two key features of Worcester Bosch intelligent and smart controls.

**Boiler controls explained**

For more information visit youtube.com/WorcesterBoschGroup

**Room thermostats**

A room thermostat monitors the air temperature and enables you to set the level you find comfortable. If the room temperature drops below this level, the thermostat switches your boiler on and if it gets too hot in the room, it turns your boiler off.

**Smart Thermostats**

Smart thermostats are internet connected to allow you to remotely control and manage your heating via an app on your smart phone or tablet. They also offer a host of other features too, such as learning functionality, optimising your heating to the weather outside, and recording how much energy you are using.

**Timers and programmers**

A boiler timer is a basic device that allows you to set specific times for your central heating system to come on and turn off, with the same times typically repeated every day. A boiler programmer allows you to set your heating (and sometimes hot water) to switch on and off at different times, but it allows you to do it on different days, so your boiler best suits your lifestyle.

**Programmable room thermostats**

A programmable room thermostat is both a boiler programmer and a room thermostat; it allows you to set different room temperatures for different times of the day and night.

**Load compensation**

The load compensation feature adjusts the temperature of the heat going to your radiators. When a room is cold the temperature will be high, but as the room warms up and less heat is needed, it lowers the temperature so that comfort is maintained but energy use is reduced.

**Weather compensation**

The weather compensation feature also adjusts the temperature of the heat going to your radiators. However, it does so in keeping with the outside temperature. An outdoor sensor or an internet location post code search (Bosch Easy only) allows the control to monitor the weather, with the radiators running hotter if temperatures outside drop, ensuring a comfortable home.
From April 2018 all new boilers installed in England must have a both a thermostat and timer fitted to meet building control requirements.

If your boiler is a combi boiler you will need to also have one of 4 energy saving measures as a part of your system, you can find about which boiler system you’re likely to need in our ‘Find a boiler’ online tool by visiting worcester-bosch.co.uk/boiler-plus.

The most practical and inexpensive energy saving measures to meet this requirement include adding a control which has one of the below features: Load Compensation, Weather Compensation or Smart Thermostat optimisation and automation.

The controls which meet this requirement without the need for any other control are highlighted with the Boiler Plus logo above.

Legal Requirements – Boiler Plus

**Smart control**

**Bosch EasyControl**
- Choose separate times and temperature from anywhere with your smart device
- With the EasyControl and Smart Thermostatic Radiator Valves (TRVs) you can easily control the heating in each individual room to give maximum comfort when and where you want it
- Uses the latest technology to automatically turn the heating down when you’re not in the house, while turning the heating up ready for when you return
- Intelligently interacts with your boiler to provide load and weather compensation features
- Boosts the systems ErP rating by up to 5% when installed with 3 Smart TRVs.

**Greenstar Sense controls**

**Sense I intelligent room thermostat**
- Ideal to replace an existing, less energy efficient wired room thermostat
- Load compensation feature for increased efficiency.

**Sense II weather compensation control**
- Intelligently interacts with your boiler to provide weather compensation via a wired outdoor sensor
- Stylish design with clear back-lit display and touch sensitive buttons
- Service reminder function.
Greenstar Comfort controls

4 Greenstar Comfort plug-in programmer
- Simple menu navigation
- Heating programme visualisation bar
- Control heating and hot water 7 days a week.

5 Greenstar Comfort I RF wireless room thermostat and plug-in programmer
All the features of the Comfort plus...
- A load compensating room thermostat for increased efficiency
- Wireless – no wiring required
- Extremely reliable Radio Frequency (RF) signal.

6 Greenstar Comfort II RF wireless programmable room thermostat
All the features of the Comfort and Comfort I plus...
- 6 adjustable heating temperatures per day
- All settings can be made from the room thermostat rather than on the boiler for maximum convenience
- Back lit display.

Mechanical timers

7 MT10 plug-in mechanical timer
- The simplest Worcester Bosch control device for setting heating start and stop times
- Analogue display.

8 MT10RF mechanical wireless thermostat
- Programmable room thermostat
- Set daily start and finish times for your heating as well as different temperatures
- Wireless system – no wiring required
- Simple installation
- Analogue display.

9 MT20RF mechanical wireless thermostat
- Our simplest control to use with a 24 hour heating start and stop time
- Easy to use mechanical timer with an analogue display
- Includes a wall mounting bracket for the 8000 boiler range.

To see which control is compatible with your preferred boiler, please see page 54.
Bosch EasyControl

The smart internet-connected heating and hot water thermostat from Bosch gives you complete control via your smart phone.

Zonal control

With the EasyControl and Smart TRVs you can easily control the heating in each individual room to give maximum comfort when and where you want it.

So, if you prefer sleeping at 17.5°C, but would like to step into a warm bathroom at 7am, simply set your desired temperature via the EasyControl app. An integrated sensor will continuously monitor the room temperature to keep it at your desired level. Several time-controlled settings are possible per day, and you can also set different times for every day of the week. After all, even early-risers stay in bed longer on Sundays!

Easy on the Eye

Available in black and white, the wall-mounted controller has a modern, sleek design, making it a stylish addition to any home.

Home presence detection

You’ll never need to worry about turning the heating down again when you leave home as the EasyControl can do it for you.

Using the latest technology, the thermostat automatically turns the heating down when you’re not in the house, while turning the heating up to your desired temperature when you’re returning home.

Superior energy rating

The EasyControl boosts the heating system’s ErP rating by 5% with a minimum of three Bosch Smart TRVs, or 4% without Smart TRVs, earning your overall system a better ErP energy classification and saving you money. The display also shows you how efficient your heating programmes are, so you can adjust settings to keep energy use at an optimum level.

WWW For more information, please visit worcester-bosch.com/easy

* With weather compensation enabled.
Transforming hot water storage

When a system or regular boiler is installed, there will always be a requirement for a hot water cylinder. Hot water is provided by taking heat from the boiler and pumping it through the central heating system to the cylinder where the heat is transferred via the cylinder’s heat exchange coils. This water is then stored ready to be passed through taps and showers when required.

Older, non-insulated cylinders tend to lose a considerable amount of heat and are likely to have a build-up of limescale, which reduces efficiency and makes water heat-up times longer. Even insulated cylinders over 10 years old lose more heat than modern ones.

Greenstore unvented cylinders have been designed to offer significant performance improvements over traditional cylinders. They combine rapid re-heat times with high heat retention and are guaranteed for 25 years*. They also come in a wide range of capacities, from 90 to 300 litres, so you can be sure of a size that’s exactly right for your home and lifestyle.

Greenstore unvented solar cylinders: the future-proof choice

Greenstore solar-compatible unvented cylinders are specifically designed to work with our Greenskies solar water heating systems. With all the same benefits as our standard unvented range, they enable you to add solar water heating to your system at a later date with no need to replace the cylinder. Available in five capacities, from 150 to 300 litres, they provide highly efficient storage for both boiler and solar-heated hot water.

Super efficient cylinders can help lower your energy bills and carbon emissions. They are highly insulated to reduce heat loss and energy wastage.

Reduced efficiency
Condensing boilers are precision-engineered and designed to run with clean water in the system. When system water becomes contaminated it can quickly cause radiator blockages as well as damage to key components in the boiler and heating system. This leads to a loss of radiator heat, increased system noise and potentially failures. It also means a shorter life for the overall system and a dramatic reduction in the boiler’s efficiency, which affects comfort and adds to your energy bills.

A perfect safeguard
The Worcester Bosch Greenstar System Filter has been specifically designed to combat the damaging effects of system debris and pollutants by capturing contaminants before they reach your boiler. Using powerful and innovative magnet-based technology, it is instantly effective at protecting the performance of your heating and hot water system, ensuring a warm and quieter, blockage free system.

Good water quality
Over time, central heating system water accumulates harmful dirt and debris, such as rust and solder fragments shed by older radiators and boilers, as well as limescale deposits from mains water, all of which can cause considerable problems in the future.

See – youtube.com/WorcesterBoschGroup – for more information
The CondenseSure clips onto the 22mm heating flow pipe allowing it to use free heat to raise the condensate temperature before it leaves your property.

Frozen boiler condensate pipes

All condensing boilers, regardless of manufacturer, will have a pipe fitted to carry away the condensed water that forms as a result of the normal condensing process. This is called the condensate pipe and is normally plastic. When condensed water runs through this pipe it means your boiler is working perfectly normally and efficiently, and the more your boiler condenses the more condense water it will produce.

When a condensing boiler is in operation it can produce up to two litres of condensate every hour which needs to flow through this pipe.

A sure solution

The CondenseSure Auxiliary Siphon has been designed to allow a more flexible approach to boiler siting and enable condensate discharge pipes to be installed externally when an internal route is not practical. The large capacity of the CondenseSure Auxiliary Siphon increases condensate discharge volume, significantly reducing the risk of freezing. The CondenseSure has been extensively tested under simulated extreme weather conditions and proved its effectiveness in preventing frozen condensate at -15ºC for a sustained period of 48 hours.

Most of the latest Worcester Bosch boiler range feature the CondenseSure siphon within the boiler. Ask your installer if you’re unsure.

See – youtube.com/WorcesterBoschGroup – for more information

Keeping you warm

Preventing frozen condensate pipework

With climate change and extreme weather variations becoming increasingly common, and very cold winters with temperatures as low as -20ºC being experienced, Worcester Bosch has developed a unique solution for externally run condensate pipework.
Expert advice and installation
How can I get a Worcester Bosch boiler?

Modern heating systems can be complex and sophisticated, and because every home is slightly different we always recommend speaking to a qualified heating installer.

There are three straightforward ways to find local professional installers...

The internet
You can do a general search for local Gas Safe registered installers on the internet. Some might have a showroom, giving you the opportunity to meet them first before you make a home visit appointment.

For your peace of mind, all Gas Safe registered installers carry a Gas Safe Register ID card, which you should ask to see when they arrive.

You can also arrange the installation of your new Worcester Bosch combi boiler through our FastTrack survey and installation service. For information, please visit worcester-bosch.co.uk/fast-track

Gas Safe registered installers
You can search for Gas Safe registered installers on the Gas Safe Register website at gassaferegister.co.uk
You can find local professionals by entering your postcode.

The website also allows you to check individuals and companies to see if they are registered and includes information on what Gas Safe registered engineers are, why it’s important to use them and how to check their ID card.

Worcester Accredited Installers
Worcester Accredited Installers are installation companies that we consider to be reputable, quality-conscious and provide value for money. They must have attended our training courses and hold all the required approvals for carrying out work at your home, such as Gas Safe accreditation, before we list them.

As well as installing and providing servicing, some also offer extended guarantees on our products.

To find a local Worcester Accredited Installer simply go to the ‘Find an Installer’ page at worcester-bosch.co.uk and enter your postcode.

For more information on how to find the boiler best for you visit worcester-bosch.co.uk/products/boilers/find-a-new-boiler

The Worcester Bosch Advice Hub

If you’re looking for advice on your current heating system, or need help looking for a new boiler, then our advice hub can provide you with useful tips and information.

**Boiler Advice**
Looking for advice on your boiler? Our hints and tips can help.

**Winter Advice**
Make sure you’re prepared for winter with our winter advice.

**Energy Efficiency**
Want to make your home more energy efficient? Our advice can help you save money.

**Heating FAQs**
Over time your boiler and heating system might require maintenance to make sure its running efficiently. Our Heating FAQ page, answers some commonly asked questions as well as providing videos.

**Home Movers**
If you’re in the process of moving house, it’s important to ask questions about your new home heating system. Our home movers hub has some helpful tips for when you first move in.

**Landlords**
If you’re a Landlord and looking for advice on boilers and heating systems, our Landlords guide can keep you up to date with legislation and provide tips on how to keep your heating systems maintained.

Visit our Advice Hub for useful tips and information

Help with selecting your new boiler

To help you choose the best boiler for your property and lifestyle we have a range of simple online tools that can be accessed at worcester-bosch.co.uk.

We know choosing a new boiler is a big decision. Our helpful find a new boiler tool will ask you to answer a few questions including your type of property, the number of bathrooms as well as bedrooms and the proposed location of the boiler.

At the end you will be shown a selection of recommended boilers and compatible control and accessories can be selected.

Then you are ready to go ahead and get a free installation quotation. Just type in your postcode to show all the Worcester Bosch Accredited Installers in your area including which of them offer finance. You can then select up to 5 installers to send your enquiry to.
Supporting you from the start

When you choose Worcester Bosch, you’ll be in the company of millions of people across the UK who value the quality, reliability and comfort of our boilers.

Our guarantee
Every one of our products is manufactured to the highest quality standards and undergoes stringent and continuous testing.

We want you to have the same confidence in our boilers as we do, which is why they come with a full parts and labour guarantee including a 10 year guarantee on the primary heat exchanger – the heart of the boiler. We also guarantee the boiler as a whole for a minimum of 5 years as standard.

The important task of registering your new Greenstar boiler will typically be carried out by your installer. If you have a query please call 0330 123 2552.

Please note your guarantee length can vary between installers and the accessories your installer has fitted.

Service and support
Whether you are thinking about buying a Greenstar boiler or you’ve owned one for a long time, we are always here to help.

Our award-winning support team can advise you on any aspect of your boiler. Friendly and knowledgeable, they’ll give you all the help you need, from choosing the right controls to technical queries, such as combining your boiler with renewable systems like solar water heating. We also have over 300 service engineers working across the country to ensure that our products always deliver high performance year after year.

Other products from Bosch

**Greenstar oil-fired boilers**

Our energy-efficient Greenstar oil-fired boilers have all the benefits of our gas-fired range. Available as combi, system or regular boilers, they are at least 90% efficient, with options for installation inside or outside your home.

All Greenstar oil-fired system and regular boilers are compatible with our Greenstore unvented cylinders, and are compatible for use with Greenskies solar water heating systems.

See more at [worcester-bosch.co.uk](http://worcester-bosch.co.uk)

**White goods**

Bosch appliances are built with precision German engineering to deliver quality and efficient performance. From large home appliances such as washing machines and ovens to small appliances from kettles to vacuum cleaners, Bosch has consistently been recognised for the highest levels of quality and reliability and has received the prestigious award of Which? Small Home Appliance Brand of the year 2018.

See more at [bosch-home.co.uk](http://bosch-home.co.uk)

**Lawn and garden**

Bosch is market leader within the garden power sector bringing new products to ensure gardening is made easier and more efficient. Most well-known for the reliable Rotak lawnmowers in both the corded and cordless segment, but with a huge product portfolio spanning tree care, plant care and grass care, we have the product you need for a fantastic garden. The Royal Horticultural Society voted the EasyPrune Power-assisted Secateurs a finalist for the awards in 2018 due to the high level of innovation and ease of use.

See more at [bosch-garden.com](http://bosch-garden.com)

**Power tools**

Bosch is market leader within the DIY power tools sector bringing constant innovation and new ergonomic designs to our product portfolio.

From the best-selling power tool in Europe in the IXO, to the 18V interchangeable battery range, making DIY easier is at the core of everything we do. The ‘DIY Week’ awards voted the EasyCut 12 NanoBlade Saw, Winner for the ‘Power Tool of the Year’ category, showing yet again why Bosch is the brand of choice.
