

Complete Solutions

Heating and cooling comfort

Why partner with Bosch?

We're here to help you and your partners embrace the latest efficient heating technologies, from property to plant room we've got you covered.

From improving efficiency to investing in the right heating and cooling products, our dedicated team is on-hand to offer consultancy and support on your next project. Our entire product range is ready and waiting – from advanced heat network HIUs, to our award-winning boilers, incredibly quiet heat pumps, clever hybrid systems, and smart controls. By combining Bosch engineering excellence and Worcester Bosch heating expertise, we can offer you bespoke solutions for properties of all shapes and sizes, from flats to commercial buildings, schools to factories, and everything in between.

Project support

Our experts will be there every step of the way.

Expert team

Expert team of heat network specialists.

Bosch engineering excellence

Reliable innovation you can trust.

Your project team

Dedicated support and expertise

Our project team are on-hand at every stage, for:

- ▶ Detailed design support
- ▶ Detailed evaluation of heat source options, feasibility and selection for all our latest heating technologies
- ▶ Tailored design meetings and site visits
- ▶ Personalised support with installation and commissioning
- ▶ End-to-end support from initial meeting to project completion and beyond

Contact us to book your free, no obligation, project consultation and site visit.

What we offer

Heat the network

Optimise your project with our BESA accredited heat interface units*. From property to plant room, with our dedicated project teams, we've got you covered.

Give your customers all the comfort and control of their own heating, without needing to install a boiler in each property.

Flow 8500 HIU

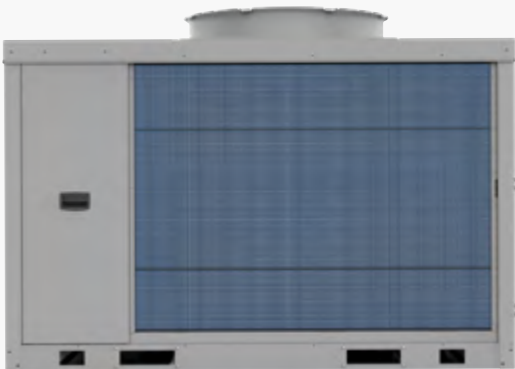

*Flow 8500 and Greenstar HIU are BESA tested.

Feel good heating

Take your next project to the next level with our CS3000 commercial heat pump.

It's perfect for both existing and new build installations in commercial and multi-family dwellings

CS3000 16-24KW Commercial heat pump

Hello hybrid heating

A heating dream team – bringing boilers and heat pumps together to offer the best of both worlds.

Hybrid heating is a simple step into new, partially electrified technology.

Condens 7000 WP

8000 controller

CS3000 53-59KW Commercial heat pump

Boilers made better

Our award-winning, energy efficient boilers are backed up with support and expert training, and we're always on hand if you need us.

From domestic and commercial boilers, to industrial steam boilers, we have a solution for your next project.

Bosch industrial steam boiler

Condens 7000 FP

Let cool rule

Help your residents live and work in comfort, enjoying cooler, cleaner, filtered air whenever it's needed.

Our energy efficient units are rated A++ for cooling and A+ for heating, so users can feel the benefit all year round.

Climate 3200i

Where can we help?

18th century manor, 21st century comfort

Transforming a single heritage building into 17 ultra-efficient homes

Salston Manor, Devon. PCR Homes.

Retaining the building’s historic charm whilst updating and expanding its heating system required creative teamwork from developer, contractor, and Bosch. The manor itself has been divided into eleven apartments, extended to provide two houses, and then a further three new-build homes were built in the grounds. With different shapes and sizes of residence, several solutions were needed to provide reliable, efficient, and long-lasting comfort.

Two 7000 WP commercial gas boilers were fitted, with with multiple Greenstar Flow 8500 Heat Interface Units, in a central plant room to heat the apartments – along with Bosch heat pumps for the houses. Together, they have brought an historic building up to the cutting edge of heating technology – which is energy efficient and easy to maintain.

Built in the 1700s as farmhouse, and later used as a hotel, the Grade II listed Salston Manor has been fully redeveloped into a multi-tech complex of 17 ultra-efficient homes.

Our reason for using Bosch for this project was the fact that they could give us a one stop shop. They could give us design, technical help, and the support whenever we required – which is a very important thing for us on this size and scale.

Transforming social housing with HIUs

Using innovative technology for an efficient communal heating system

Tom Smith Close and Ernest Dence Estate
Royal Borough of Greenwich

Tom Smith Close was fitted with Greenstar Flow 8500 Heat Interface Units, powered by air-source heat pumps and back-up boilers. With lower temperatures of hot water produced, the development now runs predominantly on HIUs. Ernest Dence was fitted with the same setup, but also utilised the first ever water-source heat pump on a council estate in London.

On both estates, using a centralised plant room minimises the interruptions to residents – as maintenance can be carried out without entering their homes. They also create a safer living environment, as there are no gas lines in the development’s flats, and help to lower energy usage overall via more efficient technology.

Two social housing developments in Greenwich, both more than 60 years old, have been modernised with innovative heating installations from Bosch.

Installing a Bosch HIU is very easy. From the pre-fixed jig to the different coloured washers, you really can’t go wrong. Commissioning is also very easy, Bosch sent down one of the technical team to walk you through it before you start – which is amazing because not all companies do that. And any assistance you need, they’re always there to help.

Re-Gen M&E Services

Our expert design team

Our team puts your needs first and goes the extra mile to understand your project, advising you on the best system design for you and your customers. With expertise across our full product range from domestic through to commercial properties, we can help however big (or small) your project is. Our MCS accredited service can offer you support from new builds to listed buildings to offices and flats, giving you peace of mind for your project requirements.

- ✓ Our expert design team are on hand to support you with developing system designs
- ✓ Our in-house specialists have vast knowledge and experience supporting the industry
- ✓ Expert design and technical support teams including dedicated renewables champions
- ✓ Design support in accordance with the latest regulations and industry guidelines
- ✓ Bespoke designs are tailored to every project's needs
- ✓ Our service is MCS accredited

Aftersales support

Our award-winning Technical Support and Customer Care teams connect you instantly to the help you need. For you or your customer, via telephone or email, our teams will support with commissioning and guarantees, enquiries and repairs, and hands-on experience and expertise to provide top-class support. Our team of engineers cover the UK to support your customers when needed.

Offering you more

Contact our team for information on how we can support with your CPDs, industry updates, knowledge-burst sessions, and more.
