## **TECHNICAL BULLETIN**

## **PRODUCT: GREENSTORE UNVENTED CYLINDERS**

## **USE OF BALANCED COLD CONNECTION**

Worcester's Greenstore range of unvented cylinders are supplied with a G3 mains water kit, incorporating an inlet control set. Within the control inlet set there is a connection point for the installer to make use of a balanced cold water connection if required.

Use of this feature is not compulsory, however it is recommended as it means that hot and cold water supply pressures will be equalised, which will help to reduce temperature fluctuations at mixed hot water outlets, such as shower mixers, bidets, and other monobloc outlets.

Whilst it is always our intention to fully assist, it is essential to recognise that all information given by the company in response to an enquiry of any nature is provided in good faith and based upon the information provided with the enquiry. We recommend that advice should always be checked with your installer or contract partner. Consequently, the company cannot be held responsible for any liability relating to the use or repetition of such information or part thereof. In addition, whilst making every reasonable effort to monitor the performance and quality of our supply, installation and service network, we do not accept responsibility for the workmanship or operation of any third party company that the company may have promoted either in conversation, e-mail or other communication. Similarly, the views and opinions expressed in communication with individuals within the company may not reflect that of the business as a whole.
