Important Notes

The appliance and its accessories may only be fitted by an approved installer.

Please also observe the following:

- ▶ This accessory kit should only be used in conjunction with the matching basic accessory kit AZB ...
- ▶ When replacing, check compatibility of accessory kit.
- ▶ Follow the installation instructions for the appliance and the accessories used.
- ▶ Make sure air/flue duct lengths are within the permissible limits.

Combination with flue ducts

The adapter may be used with the Ø 60/100 horizontal flue kit AZB 801/1, the Ø 60/100 90° bend AZB 802 and the Ø 60/100 extension duct AZB 804 to connect a short length of vertical flue pipe to the appliance before the horizontal assembly.

Only one 90° bend may be used.

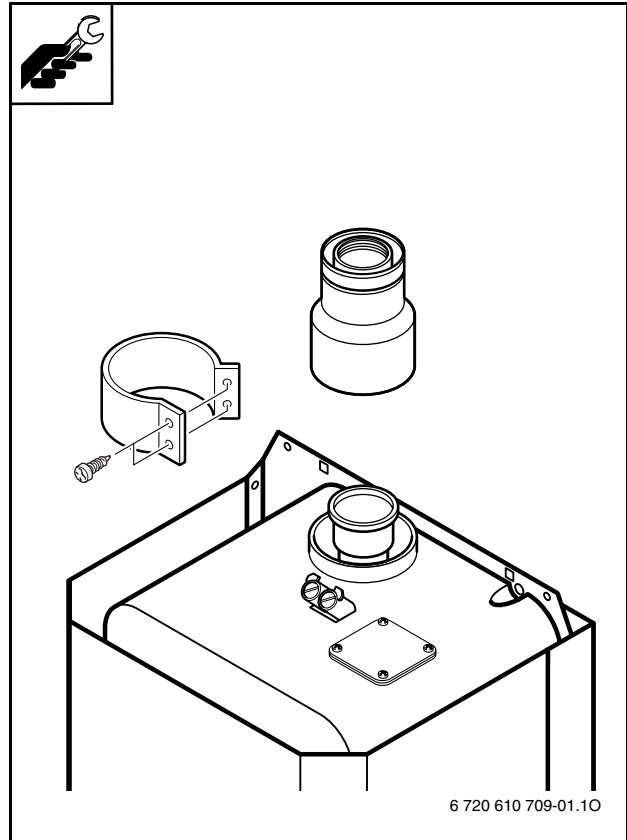

Maximum flue length

Maximum flue length under these conditions is 2 m.

The straight vertical length must not be greater than the horizontal straight length.

Mounting

- ▶ Use a silicon based grease to ease the assembly of the adapter fully onto the boiler flue outlet.
